GRIP	GENESIS Risk Intervention Program
GSA	GENESIS Service Area
IRS	Internal Revenue Service
Pov. Pop.	Poverty Population

ADDICTIONS/MENTAL HEALTH ISSUES

Goal: Reduce the use of substances and mental health issues and the associated risks in the GSA

Brief Description of Issue: GENESIS Emergency Room recorded an average of over 60 overdoses per month since January of 2018. Muskingum Valley Health Center (MVHC)'s Mental Health Services sees 15,581 clients annually with the following diagnoses: .5% alcohol related, 13.8% other substance related disorders (excluding tobacco use disorders), 29.5% depression and other mood disorders, 10.7% anxiety disorder including PTSD, 4% attention deficit and disruptive disorders, and 38% other mental disorders (excluding alcohol and drug dependencies). There are many needs and risks associated with addictions/mental health issues. Alcohol overuse, bullying, child neglect/abuse, communicable diseases, domestic violence, elder neglect/abuse, need for detox, Neonatal Abstinence Syndrome babies, opioid use, residential housing for addictions, sexual assault, suicide, tobacco use, and violence have been identified as risks associated with addictions/mental health issues (See Appendix A for risks associated with addictions/mental illness 2018 CHNA information).

Strategic Focus: GENESIS Behavioral Health, Women's and Children's Services, Educational Services, and Spiritual Care provided or participated in: health education, health promotion, professional education, healthcare support services, and collaborations and groups focused on addictions/mental health issues.

Health Education Objective	Initiatives	Risks Associated with Addictions/Mental Health Issues	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, 60 persons participated in health education focused on addictions/ mental health issues. Total: 167 Total \$CB: 893	Provided risk reduction health education classes	Alcohol overuse, bullying, child neglect/abuse, domestic violence, elder neglect/ abuse, need for detox, Neonatal Abstinence Syndrome babies, opioid use, residential housing for addictions, sexual assault, suicide, violence	GSA		GBH	Encounters: 60 <i>Gen. By December of 2021, 3,801 persons participated in health promotion focused on addictions/ mental health issues. Total: 2,573 Total \$CB: 5,468	Provided or participated in Day of Recovery, community events and podcasts	Alcohol overuse, need for detox, Neonatal Abstinence Syndrome babies, opioid use, residential housing for addictions	GSA, Pov. Pop.		GBH	Encounters: 3,801 Assessment: Increase in awareness	Encounters: 2,573 \$CB: 5,468 <i>Gen. Com.:</i> Not captured <i>Pov. Pop.:</i> Not captured Note: Due to the Covid-19 pandemic, the proposed encounters were not met. Assessment: Since 8.24.2021, outcomes have been documented. Participants at one event increased awareness by 100%.

Professional Education Objective	Initiatives	Risks Associated with Addictions/Mental Health Issues	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, 285 persons participated in professional education focused on addictions/ mental health issues. Total: 66 Total \$CB: 151	Provided Crisis Intervention Team training for public safety officers and other professional education	Alcohol overuse, bullying, child neglect/ abuse, communicable diseases, domestic violence, elder neglect/abuse, need for detox, Neonatal Abstinence Syndrome babies, opioid use, residential housing for addictions, sexual assault, suicide, tobacco use, violence	GSA		GBH	Encounters: 90 <i>Gen. Com.:</i> <i>Pov. Pop.:</i> Assessment: Increase in knowledge	Encounters: 66 \$CB: 151 <i>Gen. Com.:</i> Not captured <i>Pov. Pop.:</i> Not captured Note: Resources were redirected for this initiative in 2020-2021 due to Covid -19. Assessment: % Increased knowledge Note: A future assessment.
Healthcare Support Services Objective	Initiatives	Risks Associated with Addictions/Mental Health Issues	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, 60 persons participated in healthcare support services focused on addictions/ mental health issues. Total: 20 Total \$CB: 356	Labor & Delivery provided "Warm Hand-off" services for mothers to mental health providers for on addictions recovery for mothers & babies	Alcohol overuse, need for detox, Neonatal Abstinence Syndrome babies, opioid use, residential housing for addictions		MBH, MVH C, ABH S	GW&CS	Encounters: 60 <i>Gen. Com.:</i> <i>Pov. Pop.:</i> Assessment: Increase in support	Encounters: 17 \$CB: 275 <i>Gen. Com.:</i> Not captured <i>Pov. Pop.:</i> Not captured Note: Resources were redirected for this initiative in 2020-2021 due to Covid -19. Assessment: % Increased support Note: A future assessment.
	Added in 2019: Opiate Response Team home visits	Opioid overdoses	GSA		GSC	Encounters: <i>Gen. Com.:</i> <i>Pov. Pop.:</i> Assessment: Increase in support	Encounters: 3 \$CB: 81 <i>Gen. Com.:</i> Not captured <i>Pov. Pop.:</i> Not captured Note: Resources were redirected for this initiative in 2020-2021 due to Covid -19. Assessment: % Increased support Note: A future assessment.

Support Group Objective	Initiatives	Risks Associated with Addictions/Mental Health Issues	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December 2021, provided support groups focused on addictions/mental health issues. Total: 7 Total \$CB: 108	Added in 2019: Family and Friends Support Group		GSA		GBH	Encounters: <i>Gen. Com.:</i> <i>Pov. Pop.:</i> Assessment: Increase in support	Encounters: 7 \$CB: 108 <i>Gen. Com.:</i> Not captured <i>Pov. Pop.:</i> Not captured *Due to lack of community response, this initiative will no longer be offered.
Collaborations & Groups Objective	Initiatives	Risks Associated with Addictions/Mental Health Issues	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, 42 staff participated in collaborations and groups focused on addictions/ mental health issues. Total: 48 Total \$CB: 4,276	Attendance for meetings of community collaborations and groups focused on addictions/ mental health issues	Alcohol overuse, bullying, child neglect/ abuse, communicable diseases, domestic violence, elder neglect/abuse, need for detox, Neonatal Abstinence Syndrome babies, opioid use, residential housing for addictions, sexual assault, suicide, tobacco use, violence			GBH	Encounters: 42	Encounters: 48 \$CB: 4,276

Planning Groups: 1) **GBH** Christina Parr, Denise Williams, Theresa Hittle and Jody Stones; 2) **GW&CS** Sue Hoover, Colisa Glass, Jana Bell and Jody Stones; 3) **GES** Kristy Tigner and Jody Stones; 4) **GSC** Victoria Kumorowski and Jody Stones

HEART DISEASE

Goal: Decrease cardiovascular disease through preventive initiatives in the GSA

Brief Description of Issue: Heart disease was the number one leading cause of death in the GHSA and the number one leading cause of death in Ohio with an average for GHSA rate of 189.8 compared to Ohio (185.1) according to 2016 ODH. Guernsey, Perry, and Coshocton counties rates are higher than Ohio's rate. Access to healthy foods, diabetes, high cholesterol, lack of sleep, overweight/obese, and physical inactivity have been identified as risks associated with heart disease (See Appendix B for risks associated with heart disease 2018 CHNA information).

Strategic Focus: GENESIS Heart and Vascular Services, Cardiac Rehab, Diabetes and Nutrition Services, Population Health and Wellness, and Educational Services provided and/or participated in: health education, health promotion, professional education, and in kind or cash contributions focused on heart disease.

Health Education Objective	Initiatives	Risks Associated with	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved

Participants in one class increased knowledge by 100%.
In Kind & Cash Contributions	Initiatives	Risks Associated with Heart Disease	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, funded \$15,000 for the licensure for the EKG transmission equipment and 864 persons utilized the equipment in GSA ambulances. Total: 864 Total \$CB: 14,976	\$5,000 per year for the licensure with Physio Control for the EKG transmission equipment for GSA ambulances		GSA	Community ambulances	GH&VS	Encounters: 864 \$CB: \$15,000	Encounters: 864 \$CB: 14,976 for the licensure with Physio Control for the EKG transmission equipment in ambulances

Planning Groups: 1) **GH&VS** Tabitha McKenzie, Cathy Sorenson, and Jody Stones; 2) **GPH&W & GD&NS** Heather Shuster and Jody Stones; 3) **GCR** Heather Shuster, Logan Clark, and Jody Stones; 4) **GES** Gregory Hecllo and Jody Stones

CANCER

Goal: Reduce cancer risk in the GSA

Brief Description of Issue: Cancer was the GHSA second leading cause of death and the Ohio second leading cause of death according to 2016 ODH. Four out of six counties in the GHSA had higher rates than Ohio for cancer deaths. The average GHSA rate of 182.3 is higher than Ohio at 173.4 (See chart below). “Cancer is not one disease but many; there are more than 100 different kinds of cancer, many of which have different causes and risk factors”

- (ODH). According to 2010-2014 ODH, all six GHSA counties had higher age adjusted cancer mortality rates for males than females. Blacks had higher age adjusted cancer mortality rates than whites in three out of six counties and for those three counties the rates are much higher than Ohio.
- The incidence rates for all cancers sites and types age adjusted in the GHSA according to 2008-2012 NOC. Three out of six counties had a higher rate than Ohio.
- All six counties in the GHSA had the highest rate of invasive cancer cases for breast cancer according to the 2010-2014 Ohio Cancer Surveillance System (OCSS). The second highest rate in four out of six counties was for invasive cancer cases for lung and bronchus cancer. Prostate cancer was the second highest rate in Guernsey and Perry counties. Colon and rectum cancer was the fourth highest rate in all six counties. Uterine cancer was the fifth highest rate in five of six counties.
- All six counties in the GHSA had the highest rate of invasive cancer cases for breast cancer according to the 2010-2014 Ohio Cancer Surveillance System (OCSS). The second highest rate in four out of six counties was for invasive cancer cases for lung and bronchus cancer. Prostate cancer was the second highest rate in Guernsey and Perry counties. Colon and rectum cancer was the fourth highest rate in all six counties. Uterine cancer was the fifth highest rate in five of six counties.

Cancer screening was identified as a risk associated with cancer (See Appendix C for risks associated with cancer 2018 CHNA information).

Strategic Focus: GENESIS Cancer Care Center provided or participated in: health promotion and collaborations and groups focused on cancer.

Health Promotion Objective	Initiatives	Risks Associated with Cancer	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, 1,665 persons participated in health promotion focused on cancer. Total: 3,699 Total \$CB: 9,132	Designed and implemented a health promotion campaign focused on screening	Cancer Screenings	Seniors, Pov. Pop.	GM&PR	GCCC	Encounters: 1,500 <i>Gen. Com.:</i> <i>Pov. Collaborations & Groups Objective	Initiatives	Risks Associated with Cancer	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, 3 staff participated in collaborations and groups focused on cancer. Total: 7 Total \$CB: 951	Attendance for meetings of community collaborations and groups focused on cancer	Cancer	GSA		GCCC	Encounters: 3	Encounters: 7 \$CB: 951

Planning Group: Pebbles Thornton, Peggy Lyons, and Jody Stones

CHRONIC LUNG CONDITIONS

Goal: Decrease the complications related to chronic lung conditions in the GSA

Brief Description of Issue: Major conditions that can cause chronic lung conditions include chronic lower respiratory diseases (CLRD), asthma, and Black Lung.

- Chronic Lower Respiratory Diseases: According to 2016 ODH, the number three leading cause of death in the GHSA was CLRD. The GHSA average rate of CLRD deaths was higher at 58.9 than Ohio at 47.5.
- Chronic Obstructive Pulmonary Disease: The GHSA average 15.9% of Medicare beneficiaries with chronic obstructive pulmonary disease was higher than the national 11.2%, according to 2012 NOC.

Asthma and Black Lung have been identified as risks associated with chronic lung conditions (See Appendix D for risks associated with chronic lung conditions 2018 CHNA information). Asthma initiatives will be explored with other Service Lines.

Strategic Focus: GENESIS Pulmonary Services & Black Lung provided or participated in: health education, health promotion, community health screenings, support groups, professional education, and collaborations and groups focused on chronic lung conditions.

Health Education Objective	Initiatives	Risks Associated with Chronic Lung Conditions	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, 40 persons participated in health education focused on chronic lung conditions. STROKES

Goal: Reduce the risk and burden of strokes in the GSA

Brief Description of Issue: According to 2016 ODH, strokes are the sixth leading cause of death for the GHSA. The GHSA average rate, 38.9/100,000, was lower than Ohio (42.9). Coshocton and Morgan counties were higher than the other counties. The GHSA average 3.9% of Medicare beneficiaries who had a stroke was higher than the national 3.7%, according to 2012 NOC. High blood pressure has been identified as a risk associated with strokes (See Appendix E for risks associated with strokes 2018 CHNA information).

Strategic Focus: GENESIS Rehabilitation & Ambulatory Services provided and/or participated in: health education, health promotion, community health screenings, support groups, and participate in collaborations and groups focused on strokes.

Health Education Objective	Initiatives	Risks Associated with Strokes	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, 600 persons participated in health education focused on strokes. Total: 253 Total \$CB: 350	Provided youth classes	Stroke Signs and Symptoms	3 rd , 4 th , and 5 th graders	Schools	GR&AS	Encounters: 600 <i>Gen. Com.:</i> <i>Pov. UNINTENTIONAL INJURIES/ACCIDENTS

Goal: Reduce unintentional injuries/accident risk in the GSA

Brief Description of Issue: Unintentional injuries/accidents were the fourth leading cause of death in the GHSA. The GHSA average death rate of 62.4 was lower than Ohio at 66.6, according to 2016 ODH Arthritis, falls, firearms, joint & back pain, motor vehicle accidents, poisoning, &

workplace related injuries have been identified as risks associated with unintentional injuries/accidents (See Appendix F for risks associated with unintentional injuries/accidents 2018 CHNA information).

Strategic Focus: GENESIS Neuroscience & Orthopedic Center, Trauma Services, and Rehab & Ambulatory Services provided and/or participated in: health education, health promotion, professional education, community health screenings, healthcare support services, and participate in collaborations and groups focused on unintentional injuries/accidents.

Health Education Objective	Initiatives	Risks Associated with Unintentional Injuries/Accidents	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved

MOTHERS, CHILDREN AND INFANTS

Goal: Increase the health of mothers, children and infants in the GSA

Brief Description of Issue: The health of mothers, children, and infants is a top priority for GENESIS. From pregnancy to childhood, GENESIS provides community initiatives to address the following top priorities: babies born three or more weeks before it was due, low birth weight, babies born addicted, children with disabilities, first trimester prenatal care, teen births, childhood lead, and unwed births (See Appendix G for Mothers, Children and Infants priority issues 2018 CHNA information). Since community partners focus on children with disabilities, teen births, childhood lead, and unwed births, GENESIS focuses on the other priorities for Women, Children and Infants. The babies born addicted priority is addressed above in the Addictions/Mental Health Issues section.

Strategic Focus: GENESIS Women’s and Children’s Services provided and/or participated in: health education, health promotion, and community collaborations and groups focused on mothers, children, and infants.

Health Education Objective	Initiatives	Priority Areas for Women, Children & Infants	Target Population	Partners	Accountable Entity	2019 -2021 Proposed Outcomes	2019-2021 Outcomes Achieved
By December of 2021, 3,645 persons participated in health education initiatives focused on women, children, and infants.
